

## "L" Series Slip-in Locker Fronts

BEFORE

### Design Features

Shanahan's Manufacturing has the perfect solution for adding new life to aging lockers. Economical, yet visually appealing, the **"L" Series Locker Fronts** offer a new look to damaged, dented lockers of all sizes.

Simply cut off existing hinges, hasps and any protruding parts. Fasten the slip-in 16 ga frame to the face of the existing prepared frame, covering any unsightly and potentially hazardous rough edges. The new frame is designed to use a flush door which closes on a full width top and bottom stop. The entire new assembly only sits 7/16" proud of the existing front.

Frame and door size can be customized to suit customer requirements. These **"L" Series Locker Fronts** are also available in multi-tier sizes.

The pictures shown represent a typical **"L" Series Locker Front** installation.

AFTER

## General Specifications

### MATERIAL

**Frame** Minimum 16 ga cold rolled steel, machine punched and formed. A full width door stop is formed on top and bottom connectors. Hinges and hasps are spotwelded to the frame and installation holes are punched prior to assembly.

**Door** Minimum 20 ga (outer panel) and 24 ga (inner panel) cold rolled steel. Sandwich panel construction, welded and complete with honeycomb core for strength and sound proofing. Minimum 16 ga hinge reinforcement plates are spotwelded in place. Two rubber bumpers per door. Doors are mounted flush with "Slip-in Frame".

### COMPONENT PARTS

**Hinges** 14 ga cold rolled steel, 5 knuckle barrel.

**Hasp** Minimum 10 ga cold rolled steel, machined and formed with round opening to take padlock (by others).

**Handlebox** Minimum 20 ga cold rolled steel, chrome plated complete with handle pull. Handle pull provides a recessed opening for plastic numbered identification plates.

### FINISH

All steel surfaces are cleaned and degreased prior to painting

- iron phosphatized for positive paint adhesion
- polyester baked enamel finish of not less than 1 mil thickness.

Colour as selected per SML colour charts

- choice of any two without extra charge.
